# What I did during my winter break... as a map!

Draw a map (on paper, with your hands) that communicates something about what you did during winter break.

Think about how your map tells a story... what would one of your colleagues or I glean from your map? How did you use text, color, and other map elements to convey your story?

**Please write your name on top of your map.**

# What I did during my winter break... as a map!

Trade maps with the person next to you and try to interpret what your partner's map is trying to convey.

What elements are confusing, or clear, about your partner's map? How would you tell the same story differently?

**Discuss.**
